

ACE

Accurate Coatings Equipment

Plural component coatings system for quality application of wood finishes and sealers

▶ **Accurate Catalyst Ratios
Every Time.**

▶ Simple, cost-effective, pneumatic mixing solution to elevate your production and improve product quality.

► Accurate Coatings Equipment

ACE is an affordable and precise plural component (2K) pump system designed for the application of conversion varnishes, sealers, and primers using acid catalyst and polyester MEKP materials. Tailored to meet the needs of the wood finishing industry, this system minimizes material waste and helps optimize production output by eliminating the need for manual mixing. ACE seamlessly integrates with air assist airless and HVLP spray guns, offering versatility and adaptability for your coating applications.

- **Boost Transfer Efficiency:** Increase transfer efficiency and minimize over-spray compared to conventional air-spray methods.
- **Save Cost:** Eliminate manual mixing to achieve material and labor cost savings.
- **Gain Versatility:** ACE is compatible with a wide range of materials, catalyst ratios, and spray guns tailored to your operations.
- **Improve Product Quality:** Achieve precise and controlled application for superior coating results and control catalyzation
- **Work Smarter:** ACE delivers simple operation and easy maintenance from start up to shut down.

□ Specs

- Output: up to 0.637 gal/min output
- Air Consumption: 18.7 CFM, 530 L/min
- Catalyst Range: 2% - 11%
- Available Pump Ratio: 12:1
- Max Air Input Pressure: 100 psi (7bar)

ACE delivers precise catalyst ratios every time to control material usage, reduce quality issues downstream, and decrease labor and complexity. The ACE system is manufactured with durable, acid-resistant materials.
