

## ▶ 2:1 5-GALLON ADHESIVE SYSTEM

### DESCRIPTION:

The 2:1 5-Gallon Adhesive System operates within a 2:1–4:1 mix ratio range and is built with a mix of stainless, carbon, and zinc plated steel components for premium durability. The system delivers a more consistent output and time savings compared to cartridge applications.

### ▶ SPECIFICATIONS

- Output Capabilities: 0.38–1.2 gallons/min
- Mix Ratios: 2:1–4:1
- Standard Hose Set: 25' length ¾" diameter
- Max Air Consumption: 50CFM@100PSI
- Maximum Air Input Pressure: 100PSI (7BAR)
- Gun: CPD-6000-2 (Pro Duo Gun)

### ▶ OPTIONS

- Auto Guns
- Hose Length and Diameter

### ▶ BENEFITS

- **Cost Savings:** By switching from cartridges to our adhesive system, you'll experience material cost savings and reduced material waste.
- **Operator Satisfaction:** The improved efficiency and ease of use of our system contribute to a happier and more productive operator.
- **Increased Productivity:** Our system enables quicker application of adhesive compared to cartridges.
- **Consistent Output:** Enjoy a more reliable and uniform adhesive output, ensuring consistent bonding quality.
- **Time Savings:** Fiberdome has reduced the time to glue parts by 2-3 minutes, which is five times faster than the previous process.
